PSE2026

20th International Conference on Plasma Surface Engineering

International Conference and Exhibition

International Conference

- Established since 1988
- Biannual organized by the European Joint Committee on Plasma and Ion Surface Engineering EJC/PISE
- Supported by 18 Countries and international societies in the EJC/PISE
- Visited by 596 international participants from 34 countries at 4 continents in 2024

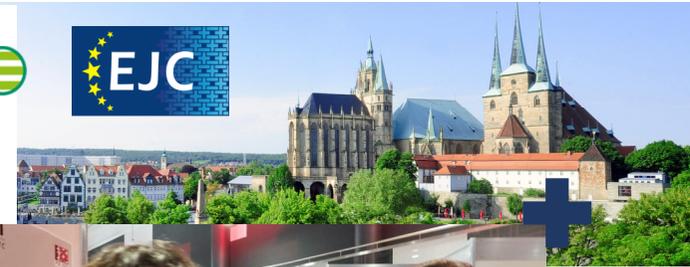

IMPORTANT DATES

Abstract Submission Deadline | January 31, 2026

Early Bird Registration | May 31, 2024

Exhibition Registration | May 31, 2024

International Conference

CONFERENCE TOPICS 2026

- Plasma and ion sources
- Process technologies
- Properties and applications
- Characterization and simulation

MAIN TOPIC

“Surface engineering for clean energy solutions”

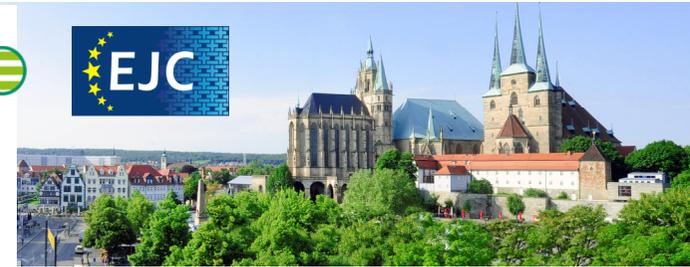

TREND TOPIC 2026

“Thin films and micro structuring methods for integrated smart systems”

TUTORIALS

- Fundamentals and trends of plasma surface engineering
- Fundamentals and trends of hydrogen technologies
- Magnetron sputtering

International Conference

Abstract Submission Deadline | January 31, 2026

CONFERENCE TOPICS

1 Plasma and ion sources

- a. Low pressure plasmas and ion beams
- b. Atmospheric pressure plasmas
- c. Plasma volume processes
- d. Plasma in liquids
- e. Particles and powders in plasmas
- f. Power supplies and process control Systems

2 Process technologies

- a. Plasma treatment, cleaning and etching
- b. Plasma diffusion technologies
- c. Physical vapor deposition
- d. Plasma-enhanced chemical vapor deposition
- e. Atomic layer deposition and etching
- f. Other plasma-based surface process technologies
- g. Post-process treatment

3 Properties and applications

- a. Protective and tribological surfaces
- b. Optical, microelectronic, quantum and magnetic coatings
- c. Biomedical and agriculture applications
- d. Energy Technologies (batteries, hydrogen, solar, nuclear power, nuclear fusion)
- e. Gas conversion processes
- f. Environmental applications
- g. Transportation and mobility

4 Characterization and simulation

- a. Modelling of film growth, structure and properties
- b. Modelling and simulation of plasma processes
- c. Plasma and process diagnostics
- d. Analytics of film structures and properties
- e. Artificial intelligence and predictive modelling

Fair Cooperation Sponsor

Every year all prices for food, electricity, heating, services and personnel expenses are rising up to visibly. To compensate all costs for the organization of this event it is necessary to rise conference and exhibition fees too. We try to avoid a pricing spiral. Support us!

Stop this trend or conferences get uneconomical!

We know all of you get increasing prices, too. The EFDS is a non-profit association. We do not plan with high outcomes and reduced secure buffers too. Every support of **discount at the final invoice** will help us to organize an economically viable conference with a good perspective for an ongoing cooperation also in future.

**Individual sponsorship
for all who are tired of rising prices.**

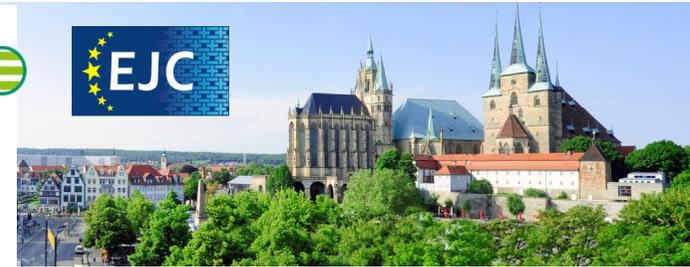

**This cannot continue! Do you agree?
Support our campaign!**

- We mention your institution as supporting affiliation at the conference and at the website.
- We post a joint statement to the topic in our social media channels.

So, we can get an open visible understanding of all involved partners, exhibitors and participants for the work and efforts of all of us.
